Hi Dennis

Attached are the updated 2017 assessments for the changed parcels. Please note that we made some footage updates based on updated information reported on the County Assessor's website, which resulted in increases and decreases to the 2017 original assessments for these parcels.

In the current MDP, the BID is allowed to correct footage errors when discovered. This is the text from page 25, 4<sup>th</sup> paragraph.

If an error is discovered on a parcel's assessed footages, the District may investigate and correct the

assessed footages after confirming the correction with the L.A. County Assessor Data and City

Clerk's office. The correction may result in an increase or decrease to the parcels assessment.

Hi Dennis

I just came out of a meeting and heard your voice mail reminder.

I am working on finishing up the updated assessments and will submit today by the end of the day.

Jose

Hi Dennis

I started on this but did not finish.

I am on vacation 8/1-5/2016.

I will finish and submit this when I come back.

Thank you

**Subject:** Re: FW: Parcel Change Report - Fashion District

Use the land area from the assessor's map, either the number written inside the parcel, or calculated from the parcel dimensions. Per the MDP:

**"Lot Square Footage Defined. Lot square footage is defined as the total amount of area within the borders of the parcel. The borders of a parcel are defined on the County Assessor parcel maps."**

So that's what we'll use.

Hi Dennis

I started working on this and have a question.

The LA County Assessor's website now provides 3 separate measurements for land area (Total SqFt (GIS) / Total SqFt (PDB) / Usable SqFt).

Which measurement are we supposed to use?
